Fixed Effects Regression Models (Quantitative Applications in the Social Sciences) By Paul D. Allison

This book demonstrates how to estimate and interpret fixed-effects models in a variety of different modeling contexts: linear models, logistic models, Poisson models, Cox regression models, and structural equation models. Both advantages and disadvantages of fixed-effects models will be considered, along with detailed comparisons with random-effects models. Written at a level appropriate for anyone who has taken a year of statistics, the book is appropriate as a supplement for graduate courses in regression or linear regression as well as an aid to researchers who have repeated measures or cross-sectional data.

Editorial Review

About the Author

Paul D. Allison, Ph.D., is Professor of Sociology at the University of Pennsylvania where he teaches graduate courses in methods and statistics. He is also the founder and president of Statistical Horizons LLC which offers short courses on a wide variety of statistical topics.

After completing his doctorate in sociology at the University of Wisconsin, he did postdoctoral study in statistics at the University of Chicago and the University of Pennsylvania. He has published eight books and more than 60 articles on topics that include linear regression, log-linear analysis, logistic regression, structural equation models, inequality measures, missing data, and survival analysis.

Much of his early research focused on career patterns of academic scientists. At present, his principal research is on methods for analyzing longitudinal data, especially those for determining the causes and consequences of events, and on methods for handling missing data.

A former Guggenheim Fellow, Allison received the 2001 Lazarsfeld Award for distinguished contributions to sociological methodology. In 2010 he was named a Fellow of the American Statistical Association. He is also a two-time winner of the American Statistical Association's award for "Excellence in Continuing Education."

Users Review

From reader reviews:

Marlene Turner:

Fixed Effects Regression Models (Quantitative Applications in the Social Sciences) can be one of your beginner books that are good idea. We recommend that straight away because this book has good vocabulary that can increase your knowledge in vocabulary, easy to understand, bit entertaining but still delivering the information. The copy writer giving his/her effort to place every word into enjoyment arrangement in writing Fixed Effects Regression Models (Quantitative Applications in the Social Sciences) yet doesn't forget the main position, giving the reader the hottest along with based confirm resource information that maybe you can be one of it. This great information may drawn you into fresh stage of crucial imagining.

Daphne Shew:

Your reading 6th sense will not betray a person, why because this Fixed Effects Regression Models (Quantitative Applications in the Social Sciences) book written by well-known writer whose to say well how to make book that may be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and creating skill only for eliminate your personal hunger then you still

hesitation Fixed Effects Regression Models (Quantitative Applications in the Social Sciences) as good book not simply by the cover but also by the content. This is one e-book that can break don't determine book by its include, so do you still needing one more sixth sense to pick this particular!? Oh come on your studying sixth sense already said so why you have to listening to a different sixth sense.

Shelia Tonn:

Reading a book for being new life style in this calendar year; every people loves to examine a book. When you read a book you can get a lot of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what forms of book that you have read. If you would like get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, in addition to soon. The Fixed Effects Regression Models (Quantitative Applications in the Social Sciences) provide you with new experience in looking at a book.

David Wilkens:

Is it a person who having spare time and then spend it whole day by watching television programs or just lying on the bed? Do you need something new? This Fixed Effects Regression Models (Quantitative Applications in the Social Sciences) can be the answer, oh how comes? The new book you know. You are therefore out of date, spending your spare time by reading in this new era is common not a geek activity. So what these books have than the others?
