## **The Universal Force Volume 1: Derived From a More Perfect Union of the Axiomatic and Empirical Scientific Methods** By Mr. Charles W. Lucas Jr.

The Universal Force Volume 1 - Derived From A More Perfect Union of the Axiomatic and Empirical Scientific Methods This is the first volume of a set. The purpose of the set of books is to lead a reformation movement in modern science to perfect the union of the ancient Greek axiomatic method of Euclid with the empirical scientific method of Isaac Newton. The first volume derives an improved version of the electrodynamic force by using a complete set of the empirical laws of electrodynamics as the postulates/axioms for the axiomatic method. In the first volume is shown that the effects of Special Relativity are due to electrical feedback effects on finite size charge structures. Also the book shows that quantum effects such as the photoelectric effect and black body radiation are due to resonant effects in finite-size charge structures consisting of closed charge loops. The improved electrodynamic force law derived in the book contains acceleration a terms for radiation and  $da/dt$  terms for radiation reaction. From this improved electrodynamic force law is derived improved versions of the force of gravity and inertia which explain many previously unexplained phenomena such as the quantization of gravity as identified by Stanley Dermott's modern version of Bode's Law and the unusual gyroscope experiments of the British engineer Eric Laithwaite. This improved electrodynamic force will be used in future volumes of this series to create new models of elementary particles, atoms, nuclei and molecules which are simpler and explain more data more accurately than previous models. A peculiar symmetry in the improved electrodynamic force law which is a combination of spherical and chiral symmetry appears in all elementary particles, atoms, nuclei, molecules, crystals, plant leaves, plant flowers, plant seed heads, animal body structures, the orbits of planets and moons in our solar system, the structure of our Milky Way galaxy, and the structure of the whole universe about its center. According to the dictionary this symmetry is the source of all beauty in nature. All of these things allow the author to declare that this improved version of electrodynamics is the true universal force and it has Platonic beauty. Such a universal force will shape the structure of the cells in the brain leaving its fingerprint in the structures of linguistics, sociology, psychology, mathematics, and architecture. Many investigators have won Nobel Prizes for showing this structure. Finally the author

has shown a relationship between the universal force and God as revealed in the Jewish, Christian and Islamic religions in his book Fingerprints of the Creator - The Source of All Beauty in Nature. Future volumes in the series will cover elementary particles, atoms, nuclei, molecules, and nature of life at the molecular and cellular level. The author was awarded the prestigious title of Physicist of the Year for 2013 by Who's Who Worldwide for the publication of this book. A number of international scientific organizations such as the Natural Philosophy Alliance, the Electric Universe, and the International Tesla Society have supported this work.

#### About the Author

Dr. Lucas has a B.S., M.S., and Ph.D. in theoretical physics with many honors throughout his academic career. He is attempting to lead a reformation movement in modern science to perfect the union of the ancient Greek axiomatic method of Euclid with the empirical scientific method of Isaac Newton. Dr. Lucas has derived an improved version of the electrodynamic force by using a complete set of the empirical laws of electrodynamics as the postulates for the axiomatic method. He has shown that the effects of Special Relativity are due to electrical feedback effects on finite size charge structures. Also he has shown that quantum effects such as the photoelectric effect and black body radiation are due to resonant effects in finite-size charge structures consisting of closed charge loops. The improved electrodynamic force law derived by Dr. Lucas contains acceleration a terms for radiation and  $da/dt$  terms for radiation reaction. From this improved electrodynamic force law he has derived improved versions of the force of gravity and inertia which explain many previously unexplained phenomena such as the quantization of gravity as identified by Stanley Dermott's modern version of Bode's Law and the unusual gyroscope experiments of the British engineer Eric Laithwaite. Dr. Lucas has used this improved electrodynamic force to create new models of elementary particles, atoms, nuclei and molecules which are simpler and explain more data more accurately than previous models. Dr. Lucas has identified a peculiar symmetry in the improved electrodynamic force law which is a combination of spherical and chiral symmetry. He shows that this symmetry appears in all elementary particles, atoms, nuclei, molecules, crystals, plant leaves, plant flowers, plant seed heads, animal body structures, the orbits of planets and moons in our solar system, the structure of our Milky Way galaxy, and the structure of the whole universe about its center. All of these things lead Dr. Lucas to declare this this improved version of electrodynamics is the true universal force. Dr. Lucas has noted that such a universal force will shape the structure of the cells in the brain leaving its fingerprint in the structures of linguistics, sociology, psychology, mathematics, and architecture. Many investigators have won Nobel Prizes for showing this structure. Finally Dr. Lucas has shown a relationship between the universal force and God as revealed in the Jewish, Christian and Islamic religions.

#### **From reader reviews:**

##### **Myron Abbott:**

Book is written, printed, or illustrated for everything. You can understand everything you want by a publication. Book has a different type. To be sure that book is important matter to bring us around the world. Close to that you can your reading ability was fluently. A reserve The Universal Force Volume 1: Derived From a More Perfect Union of the Axiomatic and Empirical Scientific Methods will make you to possibly be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think which open or reading any book make you bored. It is far from make you fun. Why they are often thought like that? Have you searching for best book or ideal book with you?

##### **Clarence Cobb:**

Reading a reserve tends to be new life style in this era globalization. With examining you can get a lot of

information that may give you benefit in your life. Along with book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or their experience. Not only the story that share in the ebooks. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors on earth always try to improve their ability in writing, they also doing some research before they write with their book. One of them is this The Universal Force Volume 1: Derived From a More Perfect Union of the Axiomatic and Empirical Scientific Methods.

**Christine Andrews:**

Beside this specific The Universal Force Volume 1: Derived From a More Perfect Union of the Axiomatic and Empirical Scientific Methods in your phone, it can give you a way to get nearer to the new knowledge or information. The information and the knowledge you may got here is fresh in the oven so don't be worry if you feel like an old people live in narrow town. It is good thing to have The Universal Force Volume 1: Derived From a More Perfect Union of the Axiomatic and Empirical Scientific Methods because this book offers to your account readable information. Do you sometimes have book but you would not get what it's all about. Oh come on, that wil happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss this? Find this book and also read it from currently!

**Dena Ramirez:**

A number of people said that they feel fed up when they reading a guide. They are directly felt the item when they get a half portions of the book. You can choose the particular book The Universal Force Volume 1: Derived From a More Perfect Union of the Axiomatic and Empirical Scientific Methods to make your current reading is interesting. Your current skill of reading proficiency is developing when you just like reading. Try to choose very simple book to make you enjoy to read it and mingle the opinion about book and studying especially. It is to be first opinion for you to like to open a book and study it. Beside that the book The Universal Force Volume 1: Derived From a More Perfect Union of the Axiomatic and Empirical Scientific Methods can to be a newly purchased friend when you're feel alone and confuse in what must you're doing of the time.
