Fundamentals of Database Indexing and Searching By Arnab Bhattacharya

Fundamentals of Database Indexing and Searching presents well-known database searching and indexing techniques. It focuses on similarity search queries, showing how to use distance functions to measure the notion of dissimilarity.

After defining database queries and similarity search queries, the book organizes the most common and representative index structures according to their characteristics. The author first describes low-dimensional index structures, memory-based index structures, and hierarchical disk-based index structures. He then outlines useful distance measures and index structures that use the distance information to efficiently solve similarity search queries. Focusing on the difficult dimensionality phenomenon, he also presents several indexing methods that specifically deal with high-dimensional spaces. In addition, the book covers data reduction techniques, including embedding, various data transforms, and histograms.

Through numerous real-world examples, this book explores how to effectively index and search for information in large collections of data. Requiring only a basic computer science background, it is accessible to practitioners and advanced undergraduate students.

Users Review

From reader reviews:

Daniel Hendrix:

Book is to be different for every grade. Book for children till adult are different content. As we know that book is very important for all of us. The book Fundamentals of Database Indexing and Searching has been making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The e-book Fundamentals of Database Indexing and Searching is not only giving you far more new information but also to be your friend when you feel bored. You can spend your current spend time to read your publication. Try to make relationship with all the book Fundamentals of Database Indexing and Searching. You never feel lose out for everything if you read some books.

Rose Villegas:

As people who live in often the modest era should be upgrade about what going on or data even knowledge to make all of them keep up with the era which can be always change and advance. Some of you maybe may update themselves by reading books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what kind you should start with. This Fundamentals of Database Indexing and Searching is our recommendation so you keep up with the world. Why, as this book serves what you want and want in this era.

Daniel Miller:

As a scholar exactly feel bored for you to reading. If their teacher expected them to go to the library or even make summary for some guide, they are complained. Just little students that has reading's internal or real their passion. They just do what the professor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring and can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Fundamentals of Database Indexing and Searching can make you truly feel more interested to read.

Richard King:

Some individuals said that they feel weary when they reading a book. They are directly felt the idea when they get a half portions of the book. You can choose the particular book Fundamentals of Database Indexing and Searching to make your current reading is interesting. Your skill of reading skill is developing when you just like reading. Try to choose straightforward book to make you enjoy to learn it and mingle the sensation about book and reading through especially. It is to be first opinion for you to like to open a book and read it. Beside that the book Fundamentals of Database Indexing and Searching can to be a newly purchased friend when you're truly feel alone and confuse using what must you're doing of their time.
