Integrated Thinking: The New IT By Ms Sue Pearson

If we change the way we use our brains, can we change the world? Changes in our brain development have been reflected throughout history in the social and political worlds our brains have created. The brain is made up of many different parts, but today one part has come to dominate our thinking in the West. This means we are missing out on the brain's key survival strategy - its ability to adapt. Just as we need to be able to change gears in a car to respond appropriately to changing circumstances, so it is with the brain. Why be a one-speed automaton when you could release the incredible power of an integrated brain and mind and change the world? This book, updated for the second edition, brings together knowledge from politics and philosophy, from technology and evolutionary psychology, from science and religion, to create a new way of thinking about ourselves and the future. For a visual guide to this new way of thinking, go to <http://youtu.be/90zkQddUsR0> (both zero's).

Editorial Review

About the Author

Just as modern computers can teach us how to use them, so our minds can show us how our brains work. This was the amazing discovery that Sue made when questioning the intellectual model that separates knowledge into different domains, without recognising the patterns that link them. Sue began by sharing her new theory in papers to international conferences, with people working in many fields and now it is available for everyone in her book, on YouTube and a blog. Sue Pearson has a law degree, and a background in business, psychology and community project delivery. She has four grandchildren, and lives in Devon.

Users Review

From reader reviews:

Robert Landers:

What do you about book? It is not important to you? Or just adding material if you want something to explain what the one you have problem? How about your extra time? Or are you busy man? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have spare time? What did you do? Everyone has many questions above. They must answer that question due to the fact just their can do this. It said that about book. Book is familiar in each person. Yes, it is correct. Because start from on guardería until university need this Integrated Thinking: The New IT to read.

Samuel Tapp:

Now a day folks who Living in the era exactly where everything reachable by interact with the internet and the resources included can be true or not need people to be aware of each data they get. How a lot more to be smart in getting any information nowadays? Of course the answer is reading a book. Reading a book can help men and women out of this uncertainty Information mainly this Integrated Thinking: The New IT book because book offers you rich details and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you probably know this.

Nichelle Shive:

Nowadays reading books are more than want or need but also turn into a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want have more knowledge just go with education and learning books but if you want really feel happy read one with theme for entertaining like comic or novel. Typically the Integrated Thinking: The New IT is kind of guide which is giving the reader unstable experience.

Jacqueline Morrison:

Book is one of source of knowledge. We can add our information from it. Not only for students and also native or citizen require book to know the update information of year to be able to year. As we know those textbooks have many advantages. Beside we add our knowledge, can bring us to around the world. By book Integrated Thinking: The New IT we can take more advantage.
