**Mastering jBPM6** By Simone Fiorini, Arun V Gopalakrishnan

**Design, build, and deploy business process-centric applications using the cutting-edge jBPM technology stack**

## About This Book

- Customize and extend the jBPM tools to integrate them into your existing solution/technology architecture
- Understand the core components of jBPM, including topics such as KIE API, RuntimeManager, KieSession, and KieBase
- Follow real-world illustrations that will help you achieve objectives using screenshots and code snippets

## Who This Book Is For

If you are a designer or developer who wants to build and operate business process-centric applications, then this book is for you. Knowledge of the basic concepts of application development in Java will be helpful in following the concepts covered in the book, but is not necessary.

## What You Will Learn

- Understand the jBPM tool stack and business process management systems, the standards, patterns, and use cases
- Build your first BPM application using the jBPM tool stack
- Monitor and manage the daily operations of business process-centric applications
- Get a detailed explanation of all the BPMN constructs supported by jBPM
- Understand the core architecture of jBPM
- Learn about the extension points and pluggable mechanisms which would help you to extend jBPM core
- Enhance your application with business process management functionalities by integrating jBPM into your existing application portfolio
- Configure the jBPM-based application to meet the non-functional requirements in production
- Integrate jBPM to the JEE, SOA, and EDA environments to use its capabilities

## In Detail

This book provides a complete understanding of the jBPM technology stack. It starts with an introduction to the world of business process management systems, the problem domain addressed by jBPM, explores the main use cases that can be addressed by business process management systems, and illustrates the main design patterns. It takes you through the details of the architecture and available out-of-the-box provisions for customizing, extending, and integrating the features of jBPM to meet the requirements of your application. Moreover, this book will empower you with the knowledge to integrate jBPM with enterprise architecture, debug through the source code of jBPM, and utilize the flexibility provided by a heavily modular system. Finally, it introduces you to the provisions available for a jBPM-based application to put the non-functional characteristics of the system, which are of great importance when we deploy our application in production. The book helps you in putting the knowledge at work by providing you with a lot of ready to use examples, both basic and advanced ones.

## **Editorial Review**

About the Author

### **Simone Fiorini**

Simone Fiorini is a seasoned professional with 20 years of software development experience, specializing in large-scale software systems, mission critical applications, and project management in a wide variety of computing environments and platforms, with a focus on EAI, BPM, and integration-oriented tools. His latest efforts are focused on an online reservation system for a large Middle East railway company and a scalable, reactive, financial market data server for a leading Italian banking group's investment bank. A graduate of both Universita di Parma (earth science) and University of Milan (engineering of computing systems), Simone resides near Brescia, where he's trying to grow roses and other fragrant flowers for his wife, Giuliana, and their two sons.

### **Arun V Gopalakrishnan**

Arun V Gopalakrishnan has more than 9 years of experience in creating architecture, designing, and developing enterprise applications used in the domains of BFSI, supply chain management, and telecom businesses. He graduated as a bachelor of technology in electronics and communications and holds a master's degree in software systems. Currently, he is playing the role of a software architect in designing and developing an enterprise middleware platform. He is well versed in service-oriented, event-driven architectures and has experience in integrating jBPM with enterprise architecture. He is passionate about learning new technologies and improving his knowledge base and expertise in JEE, OOAD, SOA, EDA, expert systems, and distributed computing. Along with this technical expertise, he enjoys engineering software applications and is an avid follower, practitioner, and mentor of agile and continuous delivery models. He believes in tools and is well versed in creating, using, and extending DevOps tools, such as Eclipse, Maven, Git, Gerrit, Jenkins, Sonar, JIRA, and MediaWiki, to enhance the efficiency of development teams.

## **Users Review**

### **From reader reviews:**

#### **Susan Ford:**

The book Mastering jBPM6 can give more knowledge and also the precise product information about everything you want. Why then must we leave the good thing like a book Mastering jBPM6? Wide variety you have a different opinion about reserve. But one aim this book can give many facts for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or data that you take for that, you can give for each other; you may share all of these. Book Mastering jBPM6 has simple shape but you know: it has great and large function for you. You can seem the enormous world by open and read a e-book. So it is very wonderful.

**Jimmie Houck:**

Do you really one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Make an effort to pick one book that you never know the inside because don't determine book by its handle may doesn't work is difficult job because you are scared that the inside maybe not as fantastic as in the outside look likes. Maybe you answer may be Mastering jBPM6 why because the wonderful cover that make you consider regarding the content will not disappoint anyone. The inside or content is definitely fantastic as the outside or even cover. Your reading sixth sense will directly make suggestions to pick up this book.

**Mathew Munz:**

Are you kind of busy person, only have 10 or perhaps 15 minute in your time to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are having problem with the book as compared to can satisfy your short space of time to read it because pretty much everything time you only find book that need more time to be read. Mastering jBPM6 can be your answer as it can be read by you who have those short free time problems.

**Donna Robinson:**

You can spend your free time to study this book this book. This Mastering jBPM6 is simple to develop you can read it in the recreation area, in the beach, train and soon. If you did not include much space to bring the particular printed book, you can buy the particular e-book. It is make you simpler to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.
