The Diffusion of Military Technology and Ideas From Stanford University Press

As military forces across the globe adopt new technologies, doctrines, and organizational forms suited to warfare in the information age, defense practitioners and academic specialists are debating the potential consequences of the "revolution in military affairs." The central question of this book is how such revolutions spread, to whom, how quickly, and with what consequences for the global balance of military power. The contributors to this volume—who include historians, political scientists, policy analysts, and sociologists—examine the diffusion of weapons technology, know-how, and methods of conducting military operations over the past two hundred years. The approach reflects the recent reawakening of interest in the relationship between culture and security. The transition from the industrial age to the information age has impacted warfare much as it has other social institutions. Advances in precision weapons, surveillance satellites, robotics, and computer-based information processing, together with organizational changes that network military units, promise to create fundamentally new ways of war; the final outcome of the current revolution is unpredictable—as the North Korean missile program shows—but its global impact will hinge on how the revolution diffuses.

Editorial Review

Review

"[*The Diffusion of Military Technology and Ideas*] is a notable scholarly achievement with profound implications for national and international security." (*The International History Review*)

"With assiduous attention to the dynamics of diffusion—especially its sensitivity to local contingencies within indigenous cultural settings—this volume succeeds in alerting policy makers to the challenges of advancing (or halting) the spread of technology. It further provides a salutary reminder that 'software'—including robust but flexible habits of mind—is often more critical to military effectiveness than hardware." (William J. Astore, Defense Language Institute Foreign Language Center, Presidio of Monterey *California*)

"The editors have brought together an excellent collection of pieces on the diffusion of military technology." (*Journal of Political and Military Sociology*)

"With its broad and sophisticated approach, this volume brings a more expansive vision and greater theoretical rigor to the study of military diffusion. It also provides a useful framework for policymakers addressing an important but complex issue." (*Technology and Culture*)

"This book offers a rich collection of research papers on very important topics....The authors were carefully chosen experts in history, political science, and sociology, who address the very important factors of national culture as they affect the application of new military technologies." (*Naval War College Review*)

From the Inside Flap

As military forces across the globe adopt new technologies, doctrines, and organizational forms suited to warfare in the information age, defense practitioners and academic specialists are debating the potential consequences of the "revolution in military affairs." The central question of this book is how such revolutions spread, to whom, how quickly, and with what consequences for the global balance of military power. The contributors to this volume—who include historians, political scientists, policy analysts, and sociologists—examine the diffusion of weapons technology, know-how, and methods of conducting military operations over the past two hundred years. The approach reflects the recent reawakening of interest in the relationship between culture and security.

The transition from the industrial age to the information age has impacted warfare much as it has other social institutions. Advances in precision weapons, surveillance satellites, robotics, and computer-based information processing, together with organizational changes that network military units, promise to create fundamentally new ways of war; the final outcome of the current revolution is unpredictable—as the North Korean missile program shows—but its global impact will hinge on how the revolution diffuses.

From the Back Cover

"With assiduous attention to the dynamics of diffusion—especially its sensitivity to local contingencies within indigenous cultural settings—this volume succeeds in alerting policy makers to the challenges of advancing (or halting) the spread of technology. It further provides a salutary reminder that "software"—including robust but flexible habits of mind—is often more critical to military effectiveness

than hardware.”—William J. Astore, Defense Language Institute Foreign Language Center, Presidio of Monterey, California

“The editors have brought together an excellent collection of pieces on the diffusion of military technology.”—Journal of Political and Military Sociology

Users Review

From reader reviews:

Joyce Johnson:

What do you ponder on book? It is just for students since they're still students or the idea for all people in the world, what best subject for that? Just you can be answered for that problem above. Every person has diverse personality and hobby per other. Don't to be forced someone or something that they don't wish do that. You must know how great as well as important the book *The Diffusion of Military Technology and Ideas*. All type of book can you see on many resources. You can look for the internet resources or other social media.

Sylvia Cunningham:

In this 21st century, people become competitive in every single way. By being competitive at this point, people have do something to make them survives, being in the middle of typically the crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yeah, by reading a guide your ability to survive increase then having chance to stand than other is high. For you personally who want to start reading a book, we give you this *The Diffusion of Military Technology and Ideas* book as beginning and daily reading guide. Why, because this book is greater than just a book.

Mae Bushee:

The particular book *The Diffusion of Military Technology and Ideas* will bring someone to the new experience of reading some sort of book. The author style to spell out the idea is very unique. In the event you try to find new book you just read, this book very suitable to you. The book *The Diffusion of Military Technology and Ideas* is much recommended to you to read. You can also get the e-book from your official web site, so you can quicker to read the book.

Hoyt Knapp:

This *The Diffusion of Military Technology and Ideas* is great guide for you because the content that is certainly full of information for you who all always deal with world and possess to make decision every minute. This kind of book reveal it data accurately using great organize word or we can say no rambling sentences inside. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but hard core information with lovely delivering sentences. Having *The Diffusion of Military Technology and Ideas* in your hand like having the world in your arm, info in it is not ridiculous a single. We can say that no publication that offer you world in ten or fifteen tiny right but this publication already do that. So , this is certainly good reading book. Hey Mr. and Mrs. stressful do you still

doubt which?
