Attack the System: A New Anarchist Perspective for the 21st Century By Keith Preston

Modern anarchist movements have existed for over 150 years. The blag flag of anarchy remains a symbol of political rebellion, particularly for restless or disenchanted young people. However, Keith Preston argues in this volume that anarchism has reached a crossroads as a political philosophy. He criticizes many contemporary anarchists as anachronistic, shallow, or even status quo in their thinking. It is Preston's contention that anarchist movements will have to grow intellectually and forge new strategic paths for themselves if they are to become politically relevant in the twenty-first century. Preston offers a substantive critique of not only his fellow anarchists, but of the condition of Western civilization itself. He recognizes the process of unprecedented centralization of political and economic power that is now taking place on a global scale. Preston's response is an unhesitating call for revolutionary action against this emerging global order. He likewise offers a critique of the inadequacies of the both the Left and Right and suggests this archaic model of the political spectrum should be discarded. It is Keith Preston's contention that anarchism should reclaim the position it held over a century ago, that of the premiere revolutionary movement throughout the world. Preston introduces his visionary tactic of "pan-secessionism" as a means of developing mutual cooperation between resistance movements with widely varying cultural and ideological values. Drawing upon an eclectic array of philosophical and historical currents, Preston offers a revolutionary political vision of decentralized pluralism manifested as a world of self-managed communities.
