## **Bulletin of ZOMBIE Research: Chapter 1** Christy J. Leppanen

Science finally explains zombies in the systems where they have become integrated - in nature, in society, and as part of our physiology. In this Chapter 1 excerpt from the BULLETIN OF ZOMBIE RESEARCH: Volume 1, bizarre and previously undocumented interactions between insects and zombies are described. In field observations and laboratory experiments, zombies are discovered to serve as hosts for other species that feed and breed in their flesh. We are now faced with zombies roaming the landscape and distributing amplified insect populations as hitchhikers clinging and falling from their bodies. But there may be an upside.

The Bulletin of ZOMBIE Research forces us to rethink our understanding of zombies with data that is shocking, disturbing, and horrifyingly believable.

In Foreword Clarion's FIVE-STAR REVIEW, Eric Anderson wrote, "This scientist's rigorous research into ZOMBIE outbreaks is dead-on." BULLETIN OF ZOMBIE RESEARCH was named the BRONZE WINNER IN HORROR in Foreword Reviews' 2014 INDIEFAB Book of the Year Awards and was a finalist for the Book of the Year Award in Humor and Science Fiction. Kirkus Reviews awarded BULLETIN OF ZOMBIE RESEARCH the KIRKUS STAR, an honor awarded to books of exceptional merit, and named BULLETIN OF ZOMBIE RESEARCH to Kirkus Reviews' BEST BOOKS OF 2014.
