

### Advances in Passive Cooling (BEST (Buildings Energy and Solar Technology))

From Routledge

## Advances in Passive Cooling (BEST (Buildings Energy and Solar Technology)) From Routledge

Following a rapid increase in the use of air conditioning in buildings of all types, the energy demand for powering such devices has become a significant cause for concern. Passive cooling is increasingly being thought of as the best alternative to air conditioning. This book offers the latest knowledge and techniques on passive cooling, enabling building professionals to understand the state of the art and employ relevant new strategies. With separate chapters on comfort, urban microclimate, solar control, ventilation, ground cooling and evaporative and radiative cooling, this authoritative text will also be invaluable for architects, engineers and students working on building physics and low-energy design. Advances in Passive Cooling is part of the BEST series, edited by Mat Santamouris. The aim of the series is to present the most current, high quality theoretical and application oriented material in the field of solar energy and energy efficient buildings. Leading international experts cover the strategies and technologies that form the basis of high-performance, sustainable buildings, crucial to enhancing our built and urban environment.

#### **Editorial Review**

#### Review

'For all those who have been unlucky enough to have roasted in ill-designed buildings, for all those who work for this not to happen, and for many more this is important and useful reading.' Alexandros N. Tombazis, Architect, Greece 'The air-conditioning industry has sold comfort as a commodity. This book not only challenges their concept of comfort but examines the ways and means that we can produce comfortable environments at minimal energy cost and hence fight global warming.' Professor Michael Wilson, Director of the Low Energy Architecture Research Unit, London Metropolitan University, UK 'This book goes back to the basic physics of human comfort and explains why many answers can be found in today's best building technologies, before relying on energy dependent devices and gadgets.' Eduardo De Oliveira Fernandes, Professor at the Faculty of Engineering, University of Porto, Portugal 'The book is essential reading for building design professionals.' Architectural Science Review

#### About the Author

Mat Santamouris is Associate Professor at the University of Athens, Greece. Contributing authors include: Fergus Nicol, Susan Roaf, Hashem Akbari, Karsten Voss, Tilmann E. Kuhn, Peter Nitz, Sebastian Herkel, Maria Wall, Bengt Hellstr?m, Maria Kolokotroni, Jens Pfafferott, Simone Walker-Hertkorn, Burkhard Sanner and Evyatar Erell.

#### **Users Review**

#### From reader reviews:

#### Willie Hickox:

A lot of people always spent their free time to vacation or maybe go to the outside with them family or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity here is look different you can read any book. It is really fun for you. If you enjoy the book that you read you can spent all day every day to reading a publication. The book Advances in Passive Cooling (BEST (Buildings Energy and Solar Technology)) it doesn't matter what good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to develop this book you can buy typically the e-book. You can m0ore easily to read this book from a smart phone. The price is not too expensive but this book possesses high quality.

#### Jason Villalobos:

Advances in Passive Cooling (BEST (Buildings Energy and Solar Technology)) can be one of your beginning books that are good idea. All of us recommend that straight away because this guide has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort to get every word into enjoyment arrangement in writing Advances in Passive Cooling (BEST (Buildings Energy and Solar Technology)) however doesn't forget the main place, giving the reader the hottest in addition to based confirm resource info that maybe you can be one among it. This great information can easily drawn you into brand new stage of crucial

contemplating.

#### **Rhonda Yowell:**

Are you kind of active person, only have 10 or maybe 15 minute in your day time to upgrading your mind talent or thinking skill actually analytical thinking? Then you have problem with the book than can satisfy your short period of time to read it because this all time you only find book that need more time to be study. Advances in Passive Cooling (BEST (Buildings Energy and Solar Technology)) can be your answer mainly because it can be read by an individual who have those short extra time problems.

#### Irene Allen:

That publication can make you to feel relax. That book Advances in Passive Cooling (BEST (Buildings Energy and Solar Technology)) was colorful and of course has pictures on the website. As we know that book Advances in Passive Cooling (BEST (Buildings Energy and Solar Technology)) has many kinds or style. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore not at all of book usually are make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading in which.
