### Editorial Review

From [Booklist](#)

This is more for people building a house than those remodeling one, but its no-nonsense, in-depth explanations and marvelously clear illustrations make it a worthwhile reference for anyone facing an expedition into the crazy world of domestic plumbing. Like any really good book, it broaches some controversy: Hemp apparently doesn't go along with the idea that fluoridated water is likely to bond with elements of polyvinyl chloride (PVC) pipes and pose a health risk. But he isn't going to tell you what to do, merely how to do whatever it is you want to do. He mentions the controversy, but he describes in some detail several kinds of pipes for every application. Showing keen appreciation of where real power in the construction universe lies, he notes that local governing bodies are the ultimate arbiters of plumbing morality, so check with them before proceeding. Creating your own plumbing system is a daunting task. Those who are game will want to have Hemp, or at least his book, at their side. *Mike Tribby*

About the Author

Hemp is a residential plumber with 22 years experience.

### Users Review

**From reader reviews:**

**Walter Crouse:**
