Underwater Acoustic Digital Signal Processing and Communication Systems

From Springer

Underwater acoustic digital signal processing and communications is an area of applied research that has witnessed major advances over the past decade. Rapid developments in this area were made possible by the use of powerful digital signal processors (DSPs) whose speed, computational power and portability allowed efficient implementation of complex signal processing algorithms and experimental demonstration of their performance in a variety of underwater environments. The early results served as a motivation for the development of new and improved signal processing methods for underwater applications, which today range from classical of autonomous underwater vehicles and sonar signal processing, to remote control underwater wireless communications. This book presents the diverse areas of underwater acoustic signal processing and communication systems through a collection of contributions from prominent researchers in these areas. Their results, both new and those published over the past few years, have been assembled to provide what we hope is a comprehensive overview of the recent developments in the field. The book is intended for a general audience of researchers, engineers and students working in the areas of underwater acoustic signal processing. It requires the reader to have a basic understanding of the digital signal processing concepts. Each topic is treated from a theoretical perspective, followed by practical implementation details. We hope that the book can serve both as a study text and an academic reference.

Editorial Review

Users Review

From reader reviews:

Clarence Cobb:

Have you spare time for any day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a stroll, shopping, or went to the actual Mall. How about open or perhaps read a book titled Underwater Acoustic Digital Signal Processing and Communication Systems? Maybe it is for being best activity for you. You understand beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with it is opinion or you have some other opinion?

Marcia Ogburn:

In this 21st centuries, people become competitive in each way. By being competitive now, people have do something to make these people survives, being in the middle of the crowded place and notice through surrounding. One thing that sometimes many people have underestimated that for a while is reading. Sure, by reading a reserve your ability to survive improve then having chance to stand up than other is high. To suit your needs who want to start reading a book, we give you this kind of Underwater Acoustic Digital Signal Processing and Communication Systems book as nice and daily reading publication. Why, because this book is usually more than just a book.

Judy Sigmund:

The event that you get from Underwater Acoustic Digital Signal Processing and Communication Systems is the more deep you searching the information that hide inside words the more you get considering reading it. It does not mean that this book is hard to understand but Underwater Acoustic Digital Signal Processing and Communication Systems giving you enjoyment feeling of reading. The article writer conveys their point in certain way that can be understood by simply anyone who read it because the author of this reserve is well-known enough. This kind of book also makes your own personal vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We highly recommend you for having this particular Underwater Acoustic Digital Signal Processing and Communication Systems instantly.

Thomas Busch:

Can you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't assess book by its protect may doesn't work at this point is difficult job because you are frightened that the inside maybe not because

fantastic as in the outside seem likes. Maybe you answer may be Underwater Acoustic Digital Signal Processing and Communication Systems why because the fantastic cover that make you consider with regards to the content will not disappoint you. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly show you to pick up this book.
