A Triumph of Genius: Edwin Land, Polaroid, and the Kodak Patent War By Ronald K. Fierstein

This riveting biography from the American Bar Association, visits the spectacular life of Edwin Land, breakthrough inventor. At the time of his death, he stood third on the list of our most prolific inventors, behind only Thomas Edison and one of Edison's colleagues. Land's most famous achievement of course, was the creation of a revolutionary film and camera system that could produce a photographic print moments after the picture was taken. The book takes you behind the scenes of his discoveries, his triumphs, and also the defeats of this reclusive genius.

You'll learn details of Land's involvement over four decades with top-secret U.S. military intelligence efforts during World War II and through the Cold War in the service of seven American presidents. Additionally, you'll thrill to the compelling first-hand look at one of our nation's most important legal battles over intellectual property—Polaroid versus Kodak. This corporate and legal struggle is a story of almost operatic dimension. What began as a cooperative and collegial relationship ended in Kodak's betrayal. The conflict led to an epic legal battle, a dramatic event for Land who, from the witness stand, personally starred in a compelling courtroom drama.

More than a simple biography, this fascinating book is a biographical legal thriller that is not to be missed!

Editorial Review

Review

"Fierstein brings the story to life in such a way that at the end, the reader actually senses the huge emotional strain that such a long, fierce, and persistent battle entailed for those participating in it." ---Paul M. Janicke, HIPLA Professor of Law, University of Houston Law Center

About the Author
