Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) From Chapman and Hall/CRC

Many of today's complex scientific applications now require a vast amount of computational power. General purpose graphics processing units (GPGPUs) enable researchers in a variety of fields to benefit from the computational power of all the cores available inside graphics cards.

Understand the Benefits of Using GPUs for Many Scientific Applications

Designing Scientific Applications on GPUs shows you how to use GPUs for applications in diverse scientific fields, from physics and mathematics to computer science. The book explains the methods necessary for designing or porting your scientific application on GPUs. It will improve your knowledge about image processing, numerical applications, methodology to design efficient applications, optimization methods, and much more.

Everything You Need to Design/Port Your Scientific Application on GPUs

The first part of the book introduces the GPUs and Nvidia's CUDA programming model, currently the most widespread environment for designing GPU applications. The second part focuses on significant image processing applications on GPUs. The third part presents general methodologies for software development on GPUs and the fourth part describes the use of GPUs for addressing several optimization problems. The fifth part covers many numerical applications, including obstacle problems, fluid simulation, and atomic physics models. The last part illustrates agent-based simulations, pseudorandom number generation, and the solution of large sparse linear systems for integer factorization. Some of the codes presented in the book are available online.

Editorial Review

Review

"This book covers not only the knowledge of GPU and CUDA programming, but also provides successful real applications in many domains, including signal processing, image processing, physics, and artificial intelligence. The most recent research outcome and the most recent progress of GPU architectures are included, such as multi-GPU programming and GPU clusters. I believe it is a very good reference for GPU and CUDA parallel programming courses as it provides detailed illustration of the architectures of GPU, programming principles of CUDA, CUDA libraries for algebra, and a series of real applications. In addition, it will definitely contribute to the progress of research in CUDA-enabled parallel computing."

?Professor Ying Liu, School of Computer and Control, University of Chinese Academy of Sciences

About the Author

Raphaël Couturier is a professor of computer science at the University of Franche-Comte and vice head of the Computer Science Department at FEMTO-ST Institute. He has co-authored over 80 articles in peer-reviewed journals and conferences. He received a Ph.D. from Henri Poincaré University. His research interests include parallel and distributed computation, numerical algorithms, GPU and FPGA computing, and asynchronous iterative algorithms.

Users Review

From reader reviews:

Bruce Bracey:

Have you spare time for the day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the Mall. How about open or maybe read a book eligible Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series)? Maybe it is being best activity for you. You already know beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with it has the opinion or you have different opinion?

Bobby McCabe:

The book Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) can give more knowledge and information about everything you want. Why then must we leave the great thing like a book Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series)? A number of you have a different opinion about reserve. But one aim this book can give many data for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or facts that you take for that, you can give for each other; you can share

all of these. Book Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) has simple shape however, you know: it has great and large function for you. You can look the enormous world by wide open and read a publication. So it is very wonderful.

Alberta Keyes:

This Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) book is simply not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is definitely information inside this book incredible fresh, you will get facts which is getting deeper an individual read a lot of information you will get. This Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) without we know teach the one who looking at it become critical in considering and analyzing. Don't become worry Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) can bring once you are and not make your bag space or bookshelves' come to be full because you can have it in your lovely laptop even telephone. This Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) having great arrangement in word as well as layout, so you will not feel uninterested in reading.

Tanya McNeil:

As we know that book is significant thing to add our expertise for everything. By a publication we can know everything we really wish for. A book is a range of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This reserve Designing Scientific Applications on GPUs (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) was filled in relation to science. Spend your extra time to add your knowledge about your research competence. Some people has different feel when they reading any book. If you know how big benefit from a book, you can experience enjoy to read a publication. In the modern era like at this point, many ways to get book which you wanted.
