HOW TO FORECAST GOLD AND SILVER USING THE WAVE PRINCIPLE: All of Robert Prechter's Real-Time Metals Commentary During the Bear Market Years of 1980-2001 By Robert R. Prechter Jr.

Why should you make How to Forecast Gold and Silver Using the Wave Principle part of YOUR library? First; How to Forecast Gold and Silver will show you what matters -- and what doesn't -- when you want to invest in precious metals. The analyses presented in The Elliott Wave Theorist did NOT look to the Fed, news headlines, politicians, or any other "external" source for information on gold and silver. Instead, it looked in one place to predict where precious metals would go: to those markets themselves. Second: You can learn from this book. More than an abstract "How To," it shows "How To Do It Right" -- and I do mean show. And it's all in real-time, when no one knows the future and the pressure is on. If you grasp the analytical principles in How to Forecast Gold and Silver, you won't ever need someone else's analytical opinion on precious metals again. You'll have your own. A final thought: How to Forecast Gold and Silver Using the Wave Principle is a coffee-table size book -- after all, think of how many years it includes! The jacket cover is a handsome piece of original artwork, designed by a professional graphic artist. Not only is this book made to read, it can also be put on display -- or serve as a gift for someone you know.

Editorial Review

Review

"Robert Prechter has been right on target for almost the whole of the gold bear market, having called previous major turning points almost to the exact dollar, which is a feat I believe to be unequalled by any other forecaster (and I read most of them). --Australian Investors Digest

"Elliott Wave Forecasting has enabled Prechter to make some remarkably accurate calls. In January of last year,, for example, he predicted gold would son peak at just over \$500 an ounce. It hit \$5111 on Feb. 15 and within two weeks fell to \$408." --Money magazine

"We can't ignore the brilliant work turned out by The Elliott Wave Theorist. By anybody's standards, Prechter's work has to be considered tops. His best predictions have been with gold, but his DJI projections are also very impressive." --Rating the Stock Selectors
