## Editorial Review

### Review

"In addition to Megan's PTSD, this text tackles tough topics including homophobia, complicated family dynamics, alcoholism and death without flinching or sugarcoating. Told through the perspective of a well-defined and likable protagonist, this text shines a bright light on the importance of mental health" -- Kirkus

"Although the circumstances of Megan's trauma are narrow, the implications of the psychological aftermath have broad applicability; the carefully drawn portrait of her symptoms effectively demonstrates the emotional toll that trauma exacts on survivors and the need for a response that goes beyond labels like 'miracle.'" -- BCCB

"Scott (*Living Dead Girl*) offers a remarkable portrait of the isolation and struggle of post-traumatic stress disorder... A painful story of being changed, but not destroyed by a trauma." --*Publishers Weekly*

"Scott crafts a realistic portrait of a teen suffering from post-traumatic stress syndrome.... Fans of stories about teens who overcome emotional damage...will immerse themselves in the finely told tale of unimaginable tragedy." --*Booklist*

### From the Author

Me and PTSD, or how I wrote a book about it without knowing I had it:

I don't like writing about having PTSD. I feel a constant need to apologize for having it because I haven't been in combat or the victim of a violent crime. My therapist says this is a huge part of why I refused to see what was happening for so long.

I suspect she's right.

In 2003, about a week after I'd gone from being the only allergy-free person in my immediate family to the one with more allergies than all of them combined, I had my first run-in with anaphylaxis.

The culprit?

Food.

For a few days after my trip to the ER, I would make myself something to eat, but within a few bites, I'd have to stop because I was sweating and shaking and convinced I could feel an itch forming in my throat. Then I realized if I didn't eat, I'd be totally safe because if I didn't eat, I wouldn't die.

So I stopped eating.

I woke up two days later in the middle of the night, sweating and screaming. I passed out trying to get up. My husband and parents (who'd come up while I was in the ER) forced me to eat two tablespoons of sugar and the next morning, I found myself headed toward my parents' home, where I spent the next six weeks learning to eat again.

It was hell. I wept the first time I ate a bite of chicken. I curled up in a ball on the floor for an hour after eating half a cup of rice. I was so sure I was going to die, but as the weeks went by, I gradually realized I wouldn't die if I ate foods I wasn't allergic to.

I ate a very restricted diet for three years after that, and eventually managed to get into the high double digits of things I would eat without fear. I learned to act like I didn't care that I was allergic to so many things, and it didn't take very long for me to believe it.

It wasn't until I started seeing a therapist in 2011 that I realized I wasn't okay with what had happened. In

fact, when I decided to have full allergy testing done again in early 2012 and found myself having nightmares, I kept wondering why I was so scared. I'd had the testing before. It took a while, sure, but it wasn't painful.

My therapist told me that I wasn't afraid of the testing, but that I was very afraid of what might happen afterward because of what had happened before. And after she asked me to talk about what had happened, she showed me a checklist for PTSD symptoms and I found out--nearly nine years later--that I have PTSD. I'm not nearly as aware or as brave as Megan is, but I've come to see that when I wrote *Miracle*, it was my subconscious screaming at me to see what was going on inside me. I've always sworn I'd never write about myself or anyone I know, but it turns out that *Miracle* is the most personal thing I've ever written. It just took me a long time to realize it.
