Chemometrics: Statistics and Computer Application in Analytical Chemistry By Matthias Otto

The third edition of this long-selling introductory textbook and ready reference covers all pertinent topics, from basic statistics via modeling and databases right up to the latest regulatory issues.

The experienced and internationally recognized author, Matthias Otto, introduces the statistical-mathematical evaluation of chemical measurements, especially analytical ones, going on to provide a modern approach to signal processing, designing and optimizing experiments, pattern recognition and classification, as well as modeling simple and nonlinear relationships. Analytical databases are equally covered as are applications of multiway analysis, artificial intelligence, fuzzy theory, neural networks, and genetic algorithms. The new edition has 10% new content to cover such recent developments as orthogonal signal correction and new data exchange formats, tree based classification and regression, independent component analysis, ensemble methods and neuro-fuzzy systems. It still retains, however, the proven features from previous editions: worked examples, questions and problems, additional information and brief explanations in the margin.

Editorial Review

From the Back Cover

The third edition of this long-selling introductory textbook and ready reference covers all pertinent topics, from basic statistics via modeling and databases right up to the latest regulatory issues.

The experienced and internationally recognized author, Matthias Otto, introduces the statistical-mathematical evaluation of chemical measurements, especially analytical ones, going on to provide a modern approach to signal processing, designing and optimizing experiments, pattern recognition and classification, as well as modeling simple and nonlinear relationships. Analytical databases are equally covered as are applications of multiway analysis, artificial intelligence, fuzzy theory, neural networks, and genetic algorithms. The new edition has 10% new content to cover such recent developments as orthogonal signal correction and new data exchange formats, tree based classification and regression, independent component analysis, ensemble methods and neuro-fuzzy systems. It still retains, however, the proven features from previous editions: worked examples, questions and problems, additional information and brief explanations in the margin.

About the Author

Since 2016, Matthias Otto is Professor emeritus of Analytical Chemistry at the TU Bergakademie Freiberg in Germany. He was born in Dresden (Germany) and did all entire studies at the University of Leipzig. In 1984 he moved to Freiberg (Germany) as a lecturer and was appointed full Professor there in 1987. He has taught almost all aspects of Analytical Chemistry, mainly within the curricula of chemistry, applied sciences and geoecology, and organizes courses in basic and advanced chemometrics. He is author and editor of successful textbooks in analytical chemistry.

Users Review

From reader reviews:

Bernard Walker:

The particular book Chemometrics: Statistics and Computer Application in Analytical Chemistry will bring one to the new experience of reading a new book. The author style to clarify the idea is very unique. Should you try to find new book to learn, this book very ideal to you. The book Chemometrics: Statistics and Computer Application in Analytical Chemistry is much recommended to you you just read. You can also get the e-book in the official web site, so you can more easily to read the book.

Tammy Medina:

The guide untitled Chemometrics: Statistics and Computer Application in Analytical Chemistry is the e-book that recommended to you you just read. You can see the quality of the reserve content that will be shown to you. The language that article author use to explained their ideas are easily to understand. The article writer was did a lot of investigation when write the book, therefore the information that they share for you is absolutely accurate. You also could possibly get the e-book of Chemometrics: Statistics and Computer Application in Analytical Chemistry from the publisher to make you much more enjoy free time.

Nancy Page:

As a student exactly feel bored to be able to reading. If their teacher inquired them to go to the library in order to make summary for some guide, they are complained. Just minor students that has reading's heart and soul or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that reading through is not important, boring and can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Chemometrics: Statistics and Computer Application in Analytical Chemistry can make you feel more interested to read.

Ethel Springer:

Many people said that they feel bored when they reading a guide. They are directly felt this when they get a half areas of the book. You can choose the actual book Chemometrics: Statistics and Computer Application in Analytical Chemistry to make your own reading is interesting. Your current skill of reading proficiency is developing when you such as reading. Try to choose very simple book to make you enjoy to see it and mingle the impression about book and reading through especially. It is to be 1st opinion for you to like to wide open a book and read it. Beside that the guide Chemometrics: Statistics and Computer Application in Analytical Chemistry can to be a newly purchased friend when you're really feel alone and confuse in doing what must you're doing of that time.
