Washing our hair is a ritual that all of us go through regularly. But are we actually doing our hair any good using store-bought shampoos and conditioners? **Have you ever noticed the list of ingredients on the label of your shampoo? There are many chemicals in each bottle, some of which are quite toxic if used over a period of time.**

Chemicals are added to commercial shampoos to prolong the shelf life, enhance the scent, create the color, and alter the form of the liquid. And that's just the basics. If it is a purpose shampoo for different types of hair, or management of the hair, even more chemicals are added.
