## **Handbook of Human Performance Technology, 3rd Edition** By James A. Pershing

The first two editions of the *Handbook of Human Performance Technology* helped define the rapidly growing and vibrant field of human performance technology - a systematic approach to improving individual and organizational performance. Exhaustively researched, this comprehensive sourcebook not only updates key foundational chapters on organizational change, evaluation, instructional design, and motivation, but it also features breakthrough chapters on "performance technology in action" and addresses many new topics in the field, such as certification, Six Sigma, and communities of practice.

Boasting fifty-five new chapters, contributors to this new edition comprise a veritable "who's who" in the field of performance improvement, including Geary Rummler, Roger Kaufman, Ruth Clark, Allison Rossett, Margo Murray, Judith Hale, Dana and James Robinson, and many others.
